

PETRO STOCK POLYETHYLENE CHANNELS

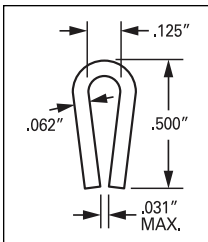

PETRO offers a line of PE Channels from stock in 6 different designs

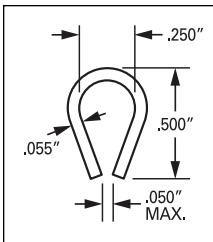

Extruded from economical LDPE, these profiles are available in sizes to cover 1/8" up to 3/8" thicknesses. PETRO PE Channels are available off-the-shelf in 100 ft. coils in black or natural color. All profiles can be produced in other colors, or cut to specific length requirements, on a custom basis.

Petro PE Channels are:

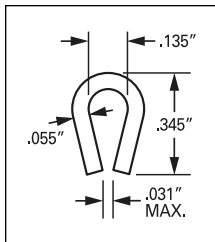

- Low Cost
- Flexible
- Available in FDA Grade PE
- Offered in standard or custom cut lengths

Also Available From PETRO – CUSTOM PE

Custom PE Tubing

to your specific size requirement, we can also quote stock or custom colors, and custom cut lengths, tailored to fit your exact specifications. Tubing can be made in thin to heavy wall thicknesses, available slitting capabilities, and ink jet printing for specialty identification.

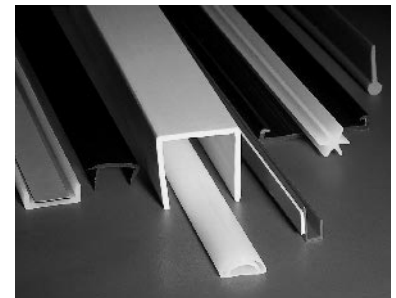

In addition to our line of Stock PE Channel profiles, PETRO also offers full custom capability for Tubing and Profile extrusion in Low, Medium and High Density Polyethylenes, as well as in Polypropylene, and EVA. Tubing is available in a wide range of sizes from as small as 1/16" diameter up to 6" diameter or larger.

Not only can PETRO supply

Tooling for many custom or standard sizes are readily available, eliminating the need for costly tool making – your PETRO sales consultant can advise if tooling is available for your specific size.

Besides our standard stock line of extruded channels, PETRO can also produce profiles for applications ranging from sign channels,

edge trims, gaskets, magazine tracks, and an endless number of custom shape requirements. Economical polyolefin materials offer cost effectiveness and integrity for all kinds of industrial applications, with added capabilities such as tape application, custom cut lengths, and printing.
