COVID-19 UPDATE

We are pleased to inform you that despite the current crisis, Petro Extrusion Technologies, Inc., is permitted to continue its full operations, and will continue to serve the needs of our customers.

Both under the Executive Order issued by Governor Murphy on 3/21/20 and because Petro Extrusion Technologies produces extruded plastic products, which are considered part of the "Essential Critical Infrastructure" of our country, our essential employees are able to continue to travel to and from work each day and we will be able to maintain full production capabilities.

Our products include extruded plastic parts used for the Health Care Industry, for medical devices, as well as parts for the wastewater treatment industry, all considered as essential and industries that we currently serve.

Of course, Petro Extrusion technologies regards the safety and health of our employees and customers as our number one priority. We are taking every precaution to ensure that we are providing a safe environment, and to prevent the spread of COVID-19, while continuing to supply quality products and service.

We currently have no production or supply chain issues to report. We will continue to monitor all of our sources in an effort to maintain the continuity of our supply, production, and shipping capabilities. However, if you have any questions, please contact us at any time.

Thanks to our loyal customers and vendors for all their continued support.

Sincerely,

Robert Petrozziello
President
